# Index according to products

MHE's 1971 articles are listed here according to product classification. In this case a code key is used rather than listing each title. The code key, A-1, B-2, C-3, etc., refers to the matching code key which precedes each article list on the preceding three pages. For instance,

the first article listed under "Bulk and liquid handling and storage equipment" (below) has the code key A-5 which refers to a matching code key on page 76. That code key precedes an article title and the month of publication and page number for that article.
